

Iris™ (English)

Congratulations on purchasing your new high-quality Webcam with built-in Microphone, better known as the "Iris™" by boynq®.

Contents of the box:

- A. Iris™ webcam
- B. Manual
- C. USB cable (attached)

Product details:

- 1) Webcam lens
- 2) Webcam focus ring
- 3) Microphone
- 4) LED's
- 5) On/off switch for Light (low, off, high)
- 6) USB connector

Installation:

The Iris™ is very easy to use. Please connect the attached USB cable to a USB 2.0 port on the computer. The computer will automatically recognize the webcam as 'boynq iris webcam'. The Webcam is now ready for use.

Operation:

- Video output: there are several options how to utilize the video output
 - Open Windows Explorer and select the Iris Webcam in the folder list, a window with the video output will appear.
 - While using VoIP and Video calling software the Iris Video Output will start once selected within the program.
- Image quality: If the image is out of focus please turn the Webcam Focus ring (2) to adjust the focus of the Webcam lens.
- Lights: The iris light can be set in 2 different intensities, put the switch in lower position for 'low light' and in high position for 'bright light'. The lights are off when the switch is in the middle position.

Please note the Webcam can only be switched on by activating the software that utilizes the Webcam functions such as VoIP and Video calling software like Skype or MSN.

Iris™ (English)
